

Installs on any Internal Combustible Engine, any Petroleum Base Fuel:

Gasoline, Diesel, Propane, CNG, Bio Fuels & Purinox Fuel Systems

ECO-5 Diesel Engines Over 500 hp

ECO-4 Long Haul Trucks, OFF Road Equipment & Heavy Diesel Less Than 500 hp

ECO-3 Diesel Pick-Ups, 454 & 460 Gasoline Engines & Medium Sized Diesels

ECO-2 6 Cylinder, V-6 & V-8 Gasoline Engines

ECO-1 1 to 4 Cylinder Gasoline/Diesel Engines, Outboard Motors, Motorcycles

ECO-7 is a 2" Diameter Unit used for Commercial Boilers in Buildings

How does the Fuel Eco Systems Enhancer Work?

The **Eco Systems** work by enhancing the fuel currently used in your engine. As the fuel passes through the unit, the vapor pressure is increased through a catalytic reaction that breaks up hydrocarbon chains in the fuel. This allows the fuel injectors to make a finer spray of fuel directly into the combustion chamber, creating a more complete and efficient burn of fuel.

The result is INCREASED PERFORMANCE, LOWERED EMISSIONS and FUEL SAVINGS.

ECO-1

Used on motorcycles and it creates a smoother and crisper throttle response with better performance.

ECO-2

Ford F150 also noted a quicker throttle response and no hesitation at take offs.

ECO-2

Installed on a 4.6 Crown Victoria. Better throttle response was noted instantly and elimination of clatter.

ECO-3

Used on larger S.U.V's with an increase in performance and fuel savings.

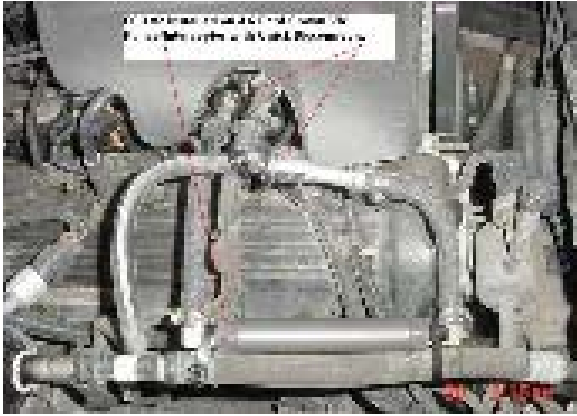

Quicker Throttle Response!

\$\$\$ SAVES FUEL \$\$\$

Prove it to yourself with a 90 day Money Back Guarantee

Installations are simple and done with quick disconnects on Fords.

Eco Systems are preferred for Law Enforcement vehicles by enhancing the fuel currently used to **INCREASE PERFORMANCE, LOWER EMISSIONS, and SAVE FUEL.** **Eco Systems** will help reduce hesitations at take-offs and eliminate clatter during heavy acceleration.
